PROFESSIONAL PROFILE

MSc Computer Science graduate with Industrial Placement from the University of East London, with hands-on experience in AWS cloud technologies, Linux system administration, Python automation, and cloud operations. Practical knowledge includes AWS services such as EC2, S3, IAM, CloudWatch, and VPC, alongside Linux environments for monitoring, troubleshooting, log analysis, and system administration. Experienced in building automation scripts, generating system reports, and supporting cloud-based application workflows through projects and internship experience. Seeking an entry-level Cloud Engineer, Cloud Support Engineer, Cloud Operations Engineer, or Junior DevOps Engineer role.

TECHNICAL SKILLS

- **Cloud Platforms:** AWS (EC2, S3, IAM, CloudWatch, VPC)
- **Operating Systems:** Linux (Ubuntu, Amazon Linux)
- **Programming & Automation:** Python, Bash Scripting, Python Automation
- **Cloud Tools:** AWS CLI, Boto3, SSH
- **Version Control:** Git, GitHub
- **Networking:** TCP/IP, DNS, HTTP/HTTPS, Routing, Subnetting
- **Monitoring & Troubleshooting:** CloudWatch, Linux Logs, System Diagnostics
- **Databases:** SQL, Relational Databases

CERTIFICATIONS

- AWS Academy Cloud Foundations
- Cisco Introduction to Cyber Security
- Cisco Introduction to Networks
- Artificial Intelligence and Machine Learning Virtual Internship (EduSkills)

PROFESSIONAL EXPERIENCE

Cloud Engineering Intern | AlvioraAI Limited | Sep 2025 - Feb 2026 | London Area, United Kingdom | Hybrid

- Supported cloud-based application development and backend functionality within a collaborative development environment.
- Assisted with API-related tasks, application testing, debugging, and deployment support activities.
- Worked with Linux-based systems to support troubleshooting, log analysis, and operational support tasks.
- Applied knowledge of AWS, Linux, networking, and Python while contributing to real-world development workflows.
- Collaborated with team members to improve application functionality, reliability, and user experience.
- Gained practical exposure to cloud infrastructure, automation concepts, and software development best practices.

AWS Academy Cloud Foundations - Practical Training | Remote

- Completed hands-on cloud training covering EC2, S3, IAM, CloudWatch, VPC, cloud architecture, and security fundamentals.
- Developed understanding of cloud storage, compute, networking, monitoring, access management, and cost awareness.

PROJECTS

Cloud Automation Project | AWS, Linux, Python

- Developed a Python-based cloud automation solution to collect Linux system health metrics including disk usage, memory utilisation, and running processes.
- Automated report generation and uploaded operational reports to AWS S3 for centralised storage and backup.
- Applied AWS services including EC2, S3, IAM, and CloudWatch concepts while strengthening Linux administration and troubleshooting skills.

Depression Detection System using Machine Learning

- Built a machine learning solution to identify depression indicators using NLP and classification techniques.
- Performed data preprocessing, feature engineering, model training, and evaluation using Python.

Online Private Tutor Finder System

- Developed a web application connecting students and tutors using location-based search functionality.
- Implemented SQL-driven filtering and integrated Google Maps API for location-based matching.

Location-Based Service for Android

- Developed an Android application for real-time location tracking and mapping.
- Integrated Firebase and Google Maps services to support location data management.

EDUCATION

Master of Science (MSc), Computer Science with Industrial Placement | University of East London | Jan 2024 - Jan 2026

- Completed an MSc in Computer Science with Industrial Placement, developing practical knowledge in cloud computing, software development, artificial intelligence, machine learning, and data analytics.
- Key learning areas: Cloud Computing, Artificial Intelligence, Machine Learning, Big Data Analytics, Software Engineering, Databases, Computer Networks, and Cybersecurity Fundamentals.

Bachelor of Technology (B.Tech), Computer Science and Engineering | Vel Tech University | Jun 2019 - May 2023

- Built a foundation in programming, data structures, algorithms, operating systems, computer networks, databases, and software development.
