PROFILE

Cloud engineer with a Distinction MSc in Computer Science (Industrial Placement) and hands-on AWS, Linux and Python experience from a cloud engineering internship. Skilled in AWS services including EC2, S3, IAM, CloudWatch and VPC, Linux monitoring, troubleshooting and log analysis, and Python and Boto3 automation. Experienced in supporting cloud-based application development, deployments, technical documentation and operational issue resolution. Seeking an entry-level Cloud Engineer, Cloud Support Engineer or Junior DevOps Engineer role.

TECHNICAL SKILLS

- **Cloud Platforms:** AWS (EC2, S3, IAM, CloudWatch, VPC), AWS CLI, Boto3
- **Operating Systems:** Linux (Ubuntu, Amazon Linux), Windows, SSH
- **Programming & Automation:** Python, Python automation, SQL
- **Networking:** TCP/IP, DNS, HTTP/HTTPS, routing, subnetting
- **Monitoring & Troubleshooting:** CloudWatch, Linux logs, system diagnostics, root-cause analysis
- **Security:** IAM users, roles and policies, least-privilege access, cloud security fundamentals
- **Development & Tools:** Git, GitHub, Flask, REST APIs, TensorFlow, relational databases

PROFESSIONAL EXPERIENCE

Cloud Engineering Intern | AlvioraAI Limited | London (Hybrid) | Sep 2025 – Feb 2026

- Troubleshot application and server issues on Linux by analysing system and application logs, isolating root causes and documenting fixes.
- Supported deployments of cloud-based applications, testing and debugging backend and API functionality before and after release.
- Tracked, reproduced and resolved reported issues, keeping the issue tracker current so fixes could be verified and closed.
- Applied AWS, Python and networking knowledge in day-to-day workflows, including diagnosing connectivity and configuration problems.
- Wrote technical documentation and runbook-style notes that made recurring operational tasks easier to repeat.
- Collaborated with developers to improve application functionality, reliability and user experience.

AWS Academy Cloud Foundations Trainee | AWS Academy | Remote

- Completed hands-on cloud training covering EC2, S3, IAM, CloudWatch and VPC, including architecture, security, storage, networking, monitoring and cost management.

Machine Learning Virtual Intern | EduSkills & AICTE | Remote | Oct 2021 – Dec 2021

- Completed an AI and machine learning internship using Python, Jupyter Notebook and introductory ML workflows.
- Practised data preprocessing, model training and evaluation using Python libraries and supervised learning concepts.

PROJECTS

Linux Health Monitoring & Reporting Automation | AWS EC2, S3, IAM, CloudWatch, Python, Boto3

- Built a Python tool that collects Linux health metrics (disk usage, memory utilisation, running processes) from an EC2 instance and generates operational reports.
- Automated upload of reports to Amazon S3 with Boto3 and the AWS CLI for centralised, backed-up storage.
- Controlled access to AWS resources through IAM and used CloudWatch to monitor instance health.

AI and Blockchain Fraud Prevention Platform | Python, Flask, TensorFlow, Web3.py, Solidity

- Built a Flask backend serving a TensorFlow deep learning model that detects suspicious e-commerce transactions in real time.
- Connected the backend to an Ethereum network with Web3.py and wrote Solidity smart contracts to record verified results and automate fraud handling.
- Evaluated the model with accuracy, recall and F1-score and delivered a working end-to-end prototype.

Depression Detection System | Python, NLP, Machine Learning

- Built a machine learning system to identify potential depression indicators from text using NLP and classification techniques.
- Performed data cleaning, text preprocessing, feature extraction, model training and evaluation in Python.

Online Private Tutor Finder | SQL, Web Application, Google Maps API

- Built a web application connecting students with tutors based on location, subject and availability.
- Implemented SQL-driven search and filtering and integrated the Google Maps API for location-based search.

EDUCATION

MSc Computer Science with Industrial Placement – Distinction | University of East London | Jan 2024 – Jan 2026

- Key areas: Cloud Computing, Artificial Intelligence, Machine Learning, Big Data Analytics, Software Engineering and Database Systems.

B.Tech Computer Science and Engineering | Vel Tech University, India | Jun 2019 – May 2023

- Foundation in programming, data structures, operating systems, computer networks, database management and software development.

CERTIFICATIONS & TRAINING

- AWS Academy Cloud Foundations (hands-on: EC2, S3, IAM, CloudWatch, VPC, cost management)
- AWS Cloud Practitioner Essentials (training course)
- Cisco Introduction to Networks
- Cisco Introduction to Cybersecurity
- Artificial Intelligence and Machine Learning Virtual Internship – EduSkills
