PUCHHALA MAHESH REDDY

maheshreddypuchhala@gmail.com | +44 7587654642 | linkedin.com/in/mahesh-reddy-puchhala-3393a135b

PROFESSIONAL PROFILE

MSc Computer Science graduate with Industrial Placement from the University of East London, with practical experience in AWS cloud services, Linux system administration, Python automation and cloud operations. Skilled in working with AWS services including EC2, S3, IAM, CloudWatch and VPC, alongside Linux-based environments for monitoring, troubleshooting, log analysis and system administration. Experienced in supporting cloud-based application development, backend tasks, technical documentation and operational issue resolution through internship and project work. Seeking an entry-level Cloud Engineer, Cloud Support Engineer or Junior DevOps Engineer role.

CORE COMPETENCIES

- AWS Cloud Services and Cloud Computing
- Linux Administration and Troubleshooting
- Python Automation and Scripting
- Cloud Monitoring and Operational Support
- Networking Fundamentals and Cloud Security Concepts
- System Diagnostics, Log Analysis and Issue Resolution
- Application Support, Testing and Debugging
- Technical Documentation and Team Collaboration

TECHNICAL SKILLS

- Cloud Platforms: AWS (EC2, S3, IAM, CloudWatch, VPC)
- Operating Systems: Linux (Ubuntu, Amazon Linux), Windows
- Programming and Automation: Python, Bash Scripting, Python Automation
- Cloud Tools: AWS CLI, Boto3, SSH
- Version Control: Git, GitHub
- Networking: TCP/IP, DNS, HTTP/HTTPS, Routing, Subnetting
- Monitoring and Troubleshooting: CloudWatch, Linux Logs, System Diagnostics
- Databases: SQL, Relational Databases

PROFESSIONAL EXPERIENCE

Cloud Engineering Intern | AlvioraAI Limited | Sep 2025 - Feb 2026 | London Area, United Kingdom | Hybrid

- Supported cloud-based application development and backend functionality within a collaborative development environment.
- Assisted with API-related tasks, application testing, debugging, deployment support and issue tracking.
- Worked with Linux-based systems to perform troubleshooting, log analysis and operational support tasks.
- Applied AWS, Linux, networking and Python knowledge while contributing to real-world development workflows.
- Collaborated with team members to improve application functionality, reliability and user experience.
- Prepared technical documentation and gained practical exposure to cloud infrastructure and automation concepts.

AWS Academy Cloud Foundations Trainee | AWS Academy | Remote

- Completed hands-on cloud training covering EC2, S3, IAM, CloudWatch and VPC.
- Developed understanding of cloud architecture, security, storage, networking, monitoring and cost management.

Machine Learning Virtual Intern | EduSkills & AICTE | Oct 2021 - Dec 2021 | Remote

- Completed an AI and machine learning internship using Python, Jupyter Notebook and introductory ML workflows.
- Practised data preprocessing, model training and evaluation using Python libraries and supervised learning concepts.

PROJECTS

Cloud Automation Project | AWS, Linux, Python

- Developed a Python-based cloud automation solution to collect Linux system health metrics including disk usage, memory utilisation and running processes.
- Automated report generation and uploaded operational reports to AWS S3 for centralised storage and backup.
- Applied EC2, S3, IAM, CloudWatch, AWS CLI, Linux administration and troubleshooting concepts.

AI and Blockchain in E-Commerce Fraud Prevention

- Developed an AI and Blockchain-based fraud prevention system for e-commerce transactions. The project used a TensorFlow deep learning model to detect suspicious transaction patterns in real time, with verified results recorded securely on a blockchain network for transparency and tamper-proof validation.
- Built the backend using Flask, connected the AI model with Ethereum blockchain through Web3.py, and developed Solidity smart contracts for automated fraud handling. Evaluated model performance using accuracy, recall, and F1-score.
- Outcome: Created a working prototype showing how AI can detect fraudulent transactions while blockchain improves trust, transparency, and data integrity in e-commerce systems.

Depression Detection System using Machine Learning | Python, NLP, Machine Learning

- Developed a machine learning system to identify potential depression indicators from text data using NLP and classification techniques.
- Performed data cleaning, text preprocessing, feature extraction, model training and evaluation using Python.
- Applied machine learning algorithms to classify text patterns and support early identification of mental health-related signals.

Online Private Tutor Finder System | SQL, Web Application, Google Maps API

- Developed a web-based application connecting students with suitable private tutors based on location, subject preference and availability.
- Implemented SQL-driven search and filtering functionality to improve tutor matching and data retrieval.
- Integrated Google Maps API to support location-based tutor search and improve user navigation.

CERTIFICATIONS AND TRAINING

- AWS Academy Cloud Foundations
- Cisco Introduction to Cyber Security
- Cisco Introduction to Networks
- Artificial Intelligence and Machine Learning Virtual Internship – EduSkills
- AWS Cloud Practitioner Essentials

EDUCATION

MSc Computer Science with Industrial Placement | University of East London | Jan 2024 - Jan 2026

- Key areas: Cloud Computing, Artificial Intelligence, Machine Learning, Big Data Analytics, Software Engineering and Database Systems.

B.Tech Computer Science and Engineering | Vel Tech University | Jun 2019 - May 2023

- Built a foundation in programming, data structures, operating systems, computer networks, database management and software development.
